Eval. Notes: On March 14th and 20th 2018, I (Brian Veit) conducted a standard compliance inspection at Magnetic Metals (An Inductotherm Industries Company), which is located at 1900 Hayes Avenue in Camden, NJ. Magnetic Metals was a metal stamping and forming business which supplied the electrical machinery industry with motor and circuit components as well as specialty electrical components for ground-fault circuit interrupters. In September of 2017, Magnetic Metals ceased operations and currently is in the process of selling all machinery in preparation to close the facility permanently. Magnetic Metals has been issued EPA ID #: NJD002334084 at this location. On this date, I met with Frank Raneiro (President) who escorted me throughout the facility. When operations ceased, there was an abundance of excess inventory and two 55-gallon drums of hazardous waste left on-site. Mr. Raneiro at first planned on sending the excess inventory to their California location, but since the inventory has been opened and there is a limited amount of inventory left on-site, he has decided to send the material off-site for disposal. On 3/14/18, Mr. Raneiro had not made an official decision to classify the inventory as waste. Due to the nature of the material remaining on-site and the fact that the facility is in the process of closing, Mr. Raneiro was advised to notify the Department that he will be conducting an episodic event for a one-time facility clean-up prior to closure. He was also provided with the regulations that govern episodic events and given instructions on how to complete EPA Form 8700-12 to make proper notification for the episodic event. There were also three 55-galons drums of used oil observed on-site; all of which were being managed properly. Mr. Raneiro contacted Shoreline Environmental Solutions LLC. to assist in consolidation, classification and disposal of the materials remaining on-site. An inventory log was provided and uploaded to the NJEMS Attachments L
